WHOLESALE FENCE

INTERSTATE

QUALITY BOUNDARIES... ENDLESS POSSIBILITIES.

Interstate Vinyl Products manufactures our *Visions* vinyl fence line in Amityville, New York.

ABOUT INTERSTATE

Our products are distributed to a select group of preferred fence contractors and distributors throughout the Northeast. Our goal is to deliver quality products which are designed to perform and meet expectations for security and beauty now and into the future. Before you make a decision on the vinyl fence products you will be investing in for your home or business, ask your fence contractor to show you our product samples and see for yourself the Interstate difference. Our Visions fence products reflect our dedication to quality.

THE INTERSTATE DIFFERENCE

Our Diverse Product Line: Available in an extensive line of styles, heights and seven colors; white, tan, adobe, gray and 3 wood grains, our Visions fence line offers infinite combinations. Suitable for a wide range of vinyl fence, railing, and pool safety applications, any Interstate dealer can recommend the right fence for each and every project.

Customization: Our complete line of vinyl fence, railings, arbors and gates can be customized. When an off the shelf product simply will not do, we offer a build-to-order customized solutions to meet the most challenging set of on-site conditions and/or needs.

Engineered Products: Our vinyl fence products are manufactured using the highest grade raw materials formulated to withstand the harsh conditions found in the Northeast. Our products are engineered with more ribs, of a heavier gauge vinyl, and are reinforced with galvanized steel stiffeners.

WHAT MAKES OUR VINYL FENCE BETTER

"The Bitterness Of Poor Workmanship Is Long Remembered After The Sweetness Of A Cheap Price Is Forgotten."

MID-RAIL: All privacy styles with a topper are manufactured with a 2" x 6" double-ribbed mid-rail. This mid-rail with its ridge design is a key component for Interstate's interlocking fence sections.

INTERLOCKING PANELS: Our fence sections use an interlocking construction which locks the vertical boards into the bottom and mid-rail. Our patented 2" x 6" rails have a ridge feature that allows this interlocking system to protect sections from knock-out and wind blowouts.

BOTTOM RAIL: The foundation of all of our PVC sections is our patented 2" x 6" heavy duty bottom rail with an internal steel support. This rail also features a ridge design for interlocking ability. The increased structural strength of this rail reduces sagging, premature failure, and damage from wind.

GATE FRAME: Vinyl gates have always been an area of product failure within the vinyl fence industry. All of our gates are manufactured using our patented 3 1/2" x 3 1/2" gate master frame. Its double walled feature enables hardware screws to penetrate two layers of the frame, as well as doubling the welding surface. This makes for stonger connections and reducing screws from pulling out. This gate master design is structurally stronger than that of our competitor's hollow or narrow gate frames. Bottom Line: *Our gates last longer!*

GATE STOP: This positive stop, patented by Interstate, is an additional piece of gate hardware that you will only find in our system. This stop is an insurance policy for all gates as it absorbs the violent act of the gate slamming and many times help protect against the resulting stress fractures and gate failure. Our gate stop is included with every walk and drive gate.

PRIVACY STYLES | OKLAHOMA

The **Oklahoma Style** is the most commonly sold vinyl fence style for its diverse applications and maximum privacy. These sections are manufactured with our full privacy interlocking tongue & groove board and heavy duty 2" x 6" steel reinforced bottom rail. We offer the Oklahoma fence and matching gate in scalloped and crowned designs.

The Oklahoma Privacy styles are available in heights ranging from 3 to 8 feet. Matching gates are available.

WOOD GRAIN AND COLOR FENCES

Our Wood Grain Vinyl Fence is unlike any other PVC fence on the market today! We offer an extensive line of Wood Grain fence styles and gates to satisfy your rear and front yard as well as pool enclosure fence needs. We have developed this product to look like natural wood, with the low maintenance advantages of vinyl. Through advancements in vinyl and acrylic materials, our Wood Grain Vinyl Fence line will last and outperform that of wood and other similar vinyl fence products well into the future. See for yourself how our products will surpass other composite and painted products on the market.

GATES

Interstate's Gates are known in the industry as being one of the strongest welded PVC gates made. Our patented gate profile is a double-wall square profile, making it structurally stronger than any other on the market. With twice the surface for welding, and double the strength to secure hardware, our gates are not only more durable but also significantly more reliable, ensuring enhanced safety and longevity for any property they protect. Included with all our gates is our patented Positive gate stop to prevent slamming and ensure controlled closing, adding an extra layer of safety and convenience to our superior gate design.

Color options available (depending on style):

The Interstate team sincerely appreciates your consideration of our company. We take great pride in the design and manufacturing of our fencing. With a history dating back to 1961, we bring extensive experience to deliver reliable and durable fencing solutions for your home or business.

When deciding on a fence for your property, consider requesting a sample to experience the quality difference. Despite the visual similarities among PVC fencing, our distinctiveness lies in our dedication to using only the highest quality materials made in the USA.
